-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3727

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The specification to which the oath or declaration is directed has not been properly identified. The serial number appears to be incorrect. See MPEP § 601.01(a).

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant is advised that it appears that “a convex outer side wall” and “a concave inner side wall” on line 2 of claim 6 are double inclusions of the outer side wall and inner side wall claimed in claim 1 as applicant has not properly related the structures.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, and 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Benciscutto, cited by applicant

Art Unit: 3727

Note figure 5 of Bencriscutto showing a ridge member 68 which is arcuate according to the shape of the golf bag. The ridge member includes inner and outer side walls and has grooves at 74 for receiving the head of irons. Members 78 define the apertures in the ridge member for receiving the golf clubs. Members 86, 88 and 90 for example define web member which inherently reinforces the ridge member by keeping the inner portion from collapsing. Members 79, 80 and 82 define the apertures in the web members for. Note the collar at 70.

4. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Turnbull, cited by applicant.

Note the club organizers of Turnbull in Figures 15-17, 23 and 24 which include a ridge member having apertures with grooves for receiving the heads of the irons. 126 and 127 define inner and outer walls for example with section 120 defining the web means rigidizing the ridge members by closing off the opening of the golf bag. Members 84 define the tubes extending from the openings. Figures 24 and 25 show arcuate ridges according to the shape of the bag.

5. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claim 5 above, and further in view of Boyce, cited by applicant.

To have merely inclined the ridge member so that the club heads are at different elevations to protect the club heads would have been obvious in view of such teaching by Boyce in a club organizer.

Art Unit: 3727

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Daly, Blackemore, Shin et al, Blitch and Kirchhoff, Jr show other club organizers.

7. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
